## UserList.vue

```
<template>
  <ul>
    <li v-for="user in users" :key="user.id">
      <slot :user="user">{{ user.firstname }} {{ user.lastname }}</slot>
    </li>
  </ul>
</template>

<script>
export default {
  props: {
    users: {
      type: Array,
      required: true
    }
  }
};
</script>
```

Consumer.vue

```
<user-list :users="users"/>
```

UserList.vue

```
<template>
  <ul>
    <li v-for="user in users" :key="user.id">
      <slot :user="user">{{ user.firstname }} {{ user.lastname }}</slot>
    </li>
  </ul>
</template>

<script>
export default {
  props: {
    users: {
      type: Array,
      required: true
    }
  }
};
</script>
```

Consumer.vue

```
<user-list :users="users">
  <template v-slot="{ user }">
    <img :src="user.avatar">
    {{ user.firstname }} {{ user.lastname }}
  </template>
</user-list>
```
